

Bhagabati Prasad Panda

FULL-STACK SOFTWARE DEVELOPER

bhagabatiprasada@gmail.com | +91 8249194704 | Bengaluru, Karnataka, India

github.com/bhagabati-prasad | linkedin.com/in/bhagabati-prasad

Full Stack Developer with 4+ years of experience building scalable, high-performance web applications using React, Angular, Node.js, and Python. Experienced in leading development efforts, designing secure systems, and optimizing performance for enterprise applications. Strong focus on clean architecture and delivering reliable, production-grade solutions.

Skills

Language: JavaScript, TypeScript, Python

Frontend: Next.js, React.js, Redux, Zustand, Angular, RxJs, Material UI, Tailwind CSS, Sass

Backend: Node.js, Express.js, Prisma, Drizzle, RabbitMQ, BullMQ, Flask, FastAPI

Authentication: JWT, OAuth, RBAC, SSO, Redis, GraphQL

Database: MySQL, PostgreSQL, MongoDB, Agile, System Design

Unit Testing: Vitest, Jest

Devops & Cloud: Git, Docker, CI/CD, AWS (EC2, S3)

Work Experience

Senior Software Developer

Rumango, Bangalore | Apr 2022 – Present

- Led development of scalable web applications using React, Angular, Node.js, and Python across multiple enterprise systems.
- Designed and implemented secure authentication systems, including multi-factor authentication and biometric verification.
- Architected and optimized backend services for high performance using caching, concurrency, and efficient data handling using .
- Mentored junior developers, conducted code reviews, and enforced best practices for clean and maintainable code.
- Collaborated with cross-functional teams to deliver end-to-end solutions from requirement analysis to deployment.
- Improved system performance, reliability, and user experience across critical business applications.

Education

Master of Computer Application (MCA)

2019 - 2022

Odisha University of Technology and Research, Bhubaneswar

Bachelor of Science (B.Sc)

2015 - 2018

D.R. Nayapalli College, Bhubaneswar

Project Work

01 - iCust – Angular | TypeScript | SCSS | Material UI | Tailwind CSS | Python

- Architected and developed a scalable banking platform supporting KYC, customer onboarding, transactions, and role-based access control.
- Built responsive and high-performance UI using Angular and React with reusable component architecture.
- Designed and integrated REST APIs and real-time communication using WebSockets for live transaction updates.
- Implemented secure authentication system with biometric verification (face, fingerprint, iris) and multi-factor authentication.
- Optimized backend performance using caching (Redis) and efficient database query handling.
- Ensured high availability and scalability through modular architecture and cloud deployment (AWS EC2, S3)

02 – Data Extraction from Documents – Python | Flask | NumPy | OpenCV | YOLO v8

- Developed an end-to-end OCR pipeline for extracting structured data from Aadhaar, PAN, Passport, and other documents.

- Built a custom object detection model (YOLOv8) for document detection and auto-cropping.
- Applied advanced image preprocessing techniques for low-light, noisy, and skewed inputs.
- Integrated multiple OCR engines (PaddleOCR, DocTr, and Tesseract) to improve extraction accuracy.
- Designed scalable API services with Flask, supporting concurrent processing using multithreading.
- Reduced manual data entry effort and improved processing efficiency across systems.

03 – Shipping Tracking System for XpressBees – React.js | Tailwind CSS | Express.js | Redis | BullMQ

- Developed scalable shipment tracking platform handling millions of records with real-time updates.
- Built dynamic UI with virtualization and infinite scrolling for efficient rendering of large datasets.
- Designed backend services with caching (Redis) and process clustering to handle high traffic.
- Optimized database queries and data pipelines for faster response times.
- Improved user experience through responsive design and performance tuning.
